SSLC, G.S Hindu Higher Secondary School, Srivilliputhur	2016-17	Percentage: 93.40

Projects

TASK MANAGER- Developed a CRUD-based task management application using Django to help users efficiently manage their daily tasks.

Technologies: Django, Python, HTML, CSS, SQLite.

Core Features: Developed functionalities to enable users to create tasks with details like title, description, status, and priority level. Implemented task list views where users can read all tasks with options to sort and filter by priority. Provided features for updating task details and deleting tasks as needed. Added filtering functionality to help users focus on high-priority tasks.

Declaration

I hereby declare that all the above furnished details and particulars are true to the best of my knowledge.
